Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations indicate unions whose rates have been determined to be prevailing.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination

* a Wage and Hour Division letter setting forth a position on a wage determination matter

* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

SECTION 02010

SUMMARY OF WORK

PART 1 GENERAL

1.1 Description

1.1.1 Work Included

This project, a first phase of the Folsom Dam Modifications Project, is for construction of the various parts of the Emergency Electrical System. This work includes the following:

The construction of an Emergency Generator Building housing two emergency generators, duct banks from the generator building to Adit 2 of the Dam and to the 5-kV switchgear in the switchyard, and power and auxiliary systems connections to the Power Plant and the Dam.

- a. The Emergency Generator Building will house two 500-kVA engine generators with radiator-mounted load banks, a synchronizing control panel, a switchboard, a grounding resistor, station-power equipment, and a 5000-gallon fuel system. This building will be a force-protected cast concrete building with a control room, generator room, and a fuel room.

The control room will house the master control panel, switchboard, resistor, station-power transfer switch, transformer, and load panel. The control room will be air conditioned by a split system heat pump.

The generator room will house the two engine generators. The east wall of the generator room will be entirely louvered for combustion and cooling air intake. Engine cooling exhaust air will be ducted through radiator-mounted load banks to louvers on the west side of the building. The exhaust mufflers will be supported from the ceiling and the exhaust pipes will extend through the west wall. The generator room will have an exhaust fan that vents into the fuel room, the control room's heat pump air handler, the HVAC control panel, and an emergency shower/eye wash.

The fuel room will contain a 5000-gallon diesel tank with leak containment, a fuel system control panel (level and leak monitoring), and a fuel-cleaning unit. Fuel is gravity fed to the engine fuel pumps and there are no day tanks. The east wall of the fuel room will be louvered.

- b. The new Emergency Generator building is located approximately thirty feet southwest of the existing Pumping Plant. It is sited at the base of a hill and is set back into the hillside. A new concrete retaining wall will provide the required separation between the new building and the hill.

- c. An existing 2-inch diameter line located under the new Emergency Generator Building will be relocated. A new ¾-inch water service line will be connected to an exterior hose bib in front of the diesel fuel tank room.

An existing 8-inch water pipe and 4 inch sewer pipe will be relocated near the entrance to adit 2.

The existing 55-KW and tank will be removed and disposed of after the new system is fully operational.
